## Overview

---

What is a sodium ion battery?

PowerCap has unveiled an innovative Sodium-ion Battery system tailored for home energy storage. This advancement offers a sustainable, safe, and cost-effective alternative to traditional Lithium-ion batteries. PowerCap, based in Queensland, has developed this technology to meet the growing demand for renewable energy solutions.

What is a PowerCap sodium-ion battery system?

In conclusion, PowerCap's Sodium-ion Battery system signifies a pivotal step in the energy storage landscape. With its focus on sustainability, safety, and affordability, the PowerCap POD system provides viable solutions for both commercial and residential users globally.

What are the benefits of sodium ion batteries?

Sodium-ion batteries provide various benefits, including longer lifespan, affordability, and complete recyclability. Made from salt sourced from the ocean, the production process is less invasive and uses abundant resources. This innovation uses Australian-made compounds from recycled plastics, bio-waste, and sodium derived from water desalination.
