

# **Vilnius double-glass solar module manufacturer**

## Overview

---

Are PV glass modules a good solution for energy efficient buildings?

These PV glass modules are not only a great and lightweight construction solution for energy efficient buildings. It provides glazing design options and endless possibilities for BIPV designers and architects to implement one of a kind exterior solutions.

What is a glass glass solar module?

Glass glass solar module is a long lasting and ultra resistant to any weather conditions Building Integrated Photovoltaics solution. BIPV solar panels can be used as an additional power source and alternative material in architecture to achieve future design for a comparable to standard materials price.

Where are SoliTek solar panels made?

In 2014, the SoliTek brand was launched, and production of glass-glass solar modules began. The company expanded into solar energy projects and installations in Lithuania by 2018. In 2020, SoliTek shifted towards battery manufacturing for solar systems, establishing partnerships for a factory in Vilnius.

What type of solar panels does metsolar offer?

Metsolar manufactures standard glass/ glass, glass/ backsheets BIPV solar panel options with possibility for variations in size, shape, transparency, JB, etc. For seamless integration and blending design. Full black modules are used when complete fusion with an object and invisibility is required.
