

Waterproof EU-style collapsible shipping container for hotels

Overview

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

Are collapsible containers good quality?

Our collapsible containers represent great value for money, while also retaining their reputation as the UK's best quality flat pack container. They are manufactured from steel, with ply board flooring in a steel frame, giving them longevity and resistance to damage, intruders and adverse weather conditions.

What size containers are used for intercontinental shipments?

The most commonly used containers for intercontinental shipments are 20' and 40' containers, also called ISO-containers. Due to standardised dimensions, they can be transported on vessels, in trucks or on rails in an effective way. Loading, shipping and unloading is simplified.

Is disposable packaging sustainable?

More and more products today are part of intercontinental supply chains and therefore transported by ocean freight. One-way packaging is still widely used, and the return shipment of empty containers is costly. Using disposable packaging, however, is neither sustainable, nor very efficient.
