

What are the four energy storage power stations in Bosnia and Herzegovina

Overview

How is energy used in Bosnia and Herzegovina?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Does Bosnia and Herzegovina need a hydropower plant?

Hydropower has historically been the dominant renewable energy source in Bosnia and Herzegovina, and several hydropower plants are in operation. The country has been exploring opportunities to expand its hydropower capacity, but such projects can face environmental and social challenges.

Is Bosnia and Herzegovina a net exporter of electricity?

Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity – the only one in the Western Balkans. More than half of its electricity generation capacity is made up of hydropower, while the remainder is made up of five lignite power plants.

What is Bosnia & Herzegovina's national Environmental Action Plan?

Bosnia and Herzegovina adopted a National Environmental Action Plan, which provides action path to address the major environmental issues of the country. In the energy sector the target will be achieved by increasing energy efficiency and usage of renewab
