Can battery problems cause EPs warning light?

Yes, insufficient battery voltage or alternator problems can cause the EPS system to malfunction and trigger the warning light. The EPS light, which stands for Electric Power Steering, is a critical indicator on a vehicle's dashboard that signals potential issues with the power steering system.

What does the EPs warning light mean on a car?

When your car's EPS (Electronic Power Steering) light comes on, it means there's an issue with the power steering. Problems with the power steering pump or fluid, the steering column, or a faulty sensor are all possible causes. Can You Drive With The EPS Warning Light?

Is It Safe.

Why does my EPs light come on?

**Low Battery Voltage:** Since EPS systems rely on electrical power, a weak or failing battery can cause the EPS light to come on. **Faulty Steering Angle Sensor:** This sensor detects the steering wheel's position and is essential for proper EPS function. Malfunctioning sensors trigger the warning light.
