

What is a solar street light

Overview

What is a solar street light?

A solar street light is a renewable energy-based outdoor lighting system that operates using solar power. It consists of photovoltaic panels (solar panels) that absorb sunlight, convert it into electrical energy, and store it in batteries to power LED or CFL lamps during nighttime.

How do solar street lights work?

The electricity generated during the day is stored in batteries, which power the LED lights during nighttime. Unlike conventional street lights that rely on grid electricity, solar-powered street lights operate independently, reducing reliance on fossil fuels and minimizing electricity costs.
