What is a pure sine wave inverter?

This type of inverter produces a smooth, sinusoidal waveform that closely resembles the power supplied by utility companies. The U.S. Department of Energy states that pure sine wave inverters provide cleaner and more efficient power delivery compared to modified sine wave inverters.

Why do you need a sine wave inverter?

Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money, as it's much more efficient than the older, jagged wave inverters.
