

# **Which solar container communication station in Malta has the most wind power**

## Overview

---

How will a floating offshore wind farm benefit Malta?

The floating offshore wind farm will play a key role in enhancing Malta's renewable energy mix, complementing the island's robust solar power infrastructure, while supporting the country's commitment to the EU's net zero carbon economy goal by 2050.

Will Malta deploy 350MW of offshore renewable capacity by 2050?

Through this agreement, Malta aims at deploying 350MW of offshore renewable capacity by 2050, with intermediate steps in 2040 and 2030 of 350MW and 50MW respectively.

What is Malta's 2030 national energy & climate plan?

Malta's 2030 National Energy and Climate Plan, updated in 2024, reaffirms Malta's commitment towards clean energy generation, highlighting offshore renewable energy as a key enabler of Malta's decreased reliance on fossil fuels.

Does Malta have a strategic environmental assessment?

The Government of Malta has already carried out a strategic Environmental Assessment as part of the development of a National Policy for the Deployment of Offshore Renewable Energy and continues to work closely with national entities to streamline the Project's permitting process.
