What is the difference between a switch and a circuit breaker?

Switches are typically used for turning power on and off to particular devices. Circuit Breakers, on the other hand, serve the purpose of circuit protection in the event of overcurrent or electric leakage. Terminal blocks consist of multiple terminals for connecting, joining or branching the flow of electric current.

What are enclosed circuit breakers & Auto resetting circuit breaker?

Our Enclosed Circuit Breakers are securely housed in metal or plastic casings that protect the breakers from dust, water or external force. Our Auto Resetting Circuit Breaker serve the purpose of restoring power supply in the event the breakers trip falsely due to lightening surge or radio wave.
